

„I am part of our success, because as a consultant I understand our customer's needs.“

Katrin, one of us since 2012.

With its business applications, IONOS is one of the leading hosting and cloud applications providers in Europe. With our state-of-the-art technologies, we convince more than 8 million customers in many different countries every day.

## SENIOR SOFTWARE ENGINEER (M/F/D)

Database as a service in Berlin or Karlsruhe

### Tasks:

- Writing code in Go and other programming languages.
- Ongoing enhancement of service quality and robustness.
- Enhancing our automation for building, testing, and deploying.
- Assisting in the operation and management of distributed systems.
- Working closely with a dynamic, self-driven team of colleagues in an agile environment.
- Tackling intriguing challenges within a dynamic cloud setting.

### Qualifications:

- Practical experience in the development, testing, and deployment of well-engineered code, with a preference for proficiency in Go.
- Valuable contributions to discussions regarding design and architecture.
- Familiarity with working in cloud environments.
- Proficiency in Kubernetes container orchestration and expertise in Helm charts.
- Proficiency in constructing Kubernetes operators, controllers, and Custom Resource Definitions (CRDs).
- Competence in managing and diagnosing issues in production environments.
- Expertise in at least two types of databases, such as relational, time-series, key-value, full-text search, persistent message queues, or document-based databases.
- Proficiency in the Linux operating system.
- Sound knowledge of network fundamentals.
